Course outline:

This class will provide spotlights on German political and social history since the end of World War II in 1945. Starting with the unconditional surrender of Germany we will take a closer look at the events leading towards the division of Germany and the foundation of the two separate states. We will then compare the historical developments in East and West Germany up to the reunification in 1989/1990. Last but not least the seminar will deal with Germany's challenges after the reunification and in the 21st century.

The first two sessions will be covered by the teacher, after that the students are required to provide presentations. The topics and respective dates for these presentations will be issued during the first session.
