In this lecture I will tell you my practical experiences as a Marketing Controller.

Learning Objectives:
At the end of our course
- students know why it is absolutely necessary for a company to build up a MSC
- you get insight into different instruments of a Marketing Controlling
- you can identify areas of application of a MSC.

Teaching and Learning Approach:
My teaching approach is very interactive. This means that students should interrupt me in the class when something is not so clear for them and they need more information. I expect that students should actively participate in every teaching session. The students’ active participation will be encouraged by a continuous questioning by the lecturer! Students who are more interested in further details of the topics are advised to consider the mentioned literature.

Teaching and Learning Methods:
- Lectures
- Active participation in class discussion
- Self study
