6.2 ...to articulate themselves in a professional manner in international business.	... to understand the influence English accounting terms and to use them in expert discussions	x

## Teaching and Learning Approach

The course is a lecture in which case studies are integrated. By means of guiding questions, overviews, examples and tasks, the material is presented in an application-oriented manner. A theoretical introduction is given to each block of topics. After the basic theoretical considerations, the students deepen the topic by means of case studies. The students can ask individual questions about the content. After the course, the students review the learning content with the help of the specified teaching and learning materials. Active participation and revision are thus an elementary component of the teaching and learning concept and good preparation for the final exam.

## Literature and Course Materials

- International Financial Reporting Standards (IFRS): Deutsch-Englische Textausgabe der von der EU gebilligten Standards (Wiley-VCH)
- International Financial Reporting Standards (IFRS), Englisch-Deutsch (IDW Textausgabe).
- Kieso/Weygandt/Warfield: Intermediate Accounting, IFRS Edition

## Assessment

The grading is based 100% upon a 60 minutes written exam in the midst of the semester (exact date and time to be announced)
