MMM2050: COMPUTER-AIDED MARKETING

Computer-aided Marketing	
Module ID	MMM2050
Semester	4
Credits	6
SWS	4
Frequency	Every semester
Associated courses	MMM2051 Digital Marketing (2 SWS / 3 Credits) AQM2031 Multivariate Statistical Methods (2 SWS / 3 Credits)
Prerequisites	At least 50 credits earned from the first stage of study.
Assessment Methods and duration	Digital Marketing: PLK - 60 minutes Multivariate Statistical Methods: PLH/PLR
Requirements for granting of credits	Passing the respective examination performance
Significance for the Final Grade	The module is weighted with its credits in the Bachelor final grade.
Planned group size	NN
Language	German
Module Duration	1 semester
Module Coordinator	Merz, Yasmin
Lecturer(s)	Merz, Yasmin; Klein, Thilo
Subject area / course of study	Multivariate Statistical Methods: Quantitative methods Digital Marketing: Marketing Communication and Advertising
Applicability in other programs	Also offered for the bachelor's degree program "Business Administration / Media Management and Advertising Psychology".
Pedagogical Approach	<u>Digital Marketing</u> : Lecture with exercises <u>Multivariate Statistical Methods</u> : Seminar-style teaching with case studies
Objectives	<u>Digital Marketing</u> <ul style="list-style-type: none"> Students gain in-depth knowledge of online marketing and its integration into integrated corporate communications. They know the possibilities and limitations of these technologies and are able to examine and evaluate the usefulness of using certain communication technologies. They know the different forms of advertising on the Internet as well as e-commerce business models. You can analyze and optimize web presences with regard to search engine and usability.

	<p><u>Multivariate Statistical Methods</u></p> <ul style="list-style-type: none"> • Students will be familiar with statistical data analysis techniques and be able to apply them to specific research questions. • You will be able to analyze data using SPSS and interpret and present the results. <p>The module thus primarily serves to deepen knowledge and to acquire instrumental competence. The course Computer-based Management Methods also contributes significantly to the acquisition of systemic and communicative competencies.</p>
Content	<p><u>Digital Marketing</u></p> <ul style="list-style-type: none"> • Introduction to modern media and communication technologies • Strategic analysis of the use of new media • Online advertising and e-commerce • Optimization of web presences <p><u>Multivariate Statistical Methods</u></p> <ul style="list-style-type: none"> • Application of computer-aided data analysis • Data evaluation with statistical methods • Interpretation and presentation of the results
Relation to other modules	<p>The module builds on the modules on Quantitative Methods as well as the course-specific modules of the previous semesters.</p>
Workload	<p><u>Digital Marketing</u>: 2 x 15 SWS = 30 SWS contact hours plus 60h for preparation / rework</p> <p><u>Multivariate Statistical Methods</u>: 2 x 15 SWS = 30 SWS contact hours plus 60h for preparation / rework</p>
Literature	<ul style="list-style-type: none"> • Brosius, F.: SPSS, Heidelberg • Bühl, A.: SPSS 20. introduction to modern data analysis, Munich • Chaffey, M./ Ellis-Chadwick, F./Johnston, K. /Mayer, R.: Internet Marketing. Strategy, Implementation and Practice • Fischer, M.: Website Boosting • Wersig, G.: Information and communication technologies
Additional Remarks	<p>The PLH and PLR examinations in the course "<u>Multivariate Statistical Methods</u>" are generally carried out in the form of teamwork in groups of 2 to 4 students (individual assignment reserved for PLH). The teamwork is also subject to self-evaluation by the students (this should help to sustainably support the promotion of social competence, cf. training teamwork in the SIK program).</p> <p>One of the two sub-courses is usually organized as a fast track, with completion of the exam(s) well before the normal exam period.</p>

Keywords	<u>Digital Marketing</u> : Simulation, Data Analysis, Online Marketing, E-commerce, Social Media, Search Engine Marketing <u>Multivariate Statistical Methods</u> : multivariate methods, SPSS, statistics

Semester	6
Credits	10
SWS	4
Frequency	Every semester
Associated courses	MCO 3411: Business Project in Advertising and Marketing-Communication
Prerequisites	At least 50 credits earned from the first stage of study.
Assessment Methods and duration	PLH/PLR/PLP
Requirements for granting of credits	Passing the examination performance
Significance for the Final Grade	The module is weighted with its credits in the Bachelor final grade.
Planned group size	max. 40 students in groups of max. 10-15 students.
Language	German
Module Duration	1 semester
Module Coordinator	Tropp, Jörg
Lecturer(s)	Theobald, Elke; Tropp, Jörg
Subject area / course of study	Marketing communication and advertising
Applicability in other programs	None
Pedagogical Approach	Project work
Objectives	<p>As part of the practical project, students are expected to solve a complex management or research) task from the field of marketing/communication.</p> <p>Based on a briefing from practice (usually by a company), the project is to be worked on independently by student teams under the supervision of a professor, from the analysis of the initial situation, the development of the methodological approach, the implementation and evaluation of the empirical study to the presentation of results and recommendation of action.</p> <p>The results should be documented in writing and presented orally to the "client".</p> <p>In addition to the application and consolidation of specialist knowledge, interdisciplinary skills, social skills and methodological skills (presentation) should also be trained.</p> <p>The module thus primarily serves to deepen knowledge and to acquire instrumental, systemic and communicative competence.</p>

Content	Solution of a concrete practical task or development and implementation of a research project; contents and concrete task depend on the respective project.
Relation to other modules	The module is based on the course-specific events of the 3rd and 4th semesters, in particular the module "Advanced Marketing Communications". The module prepares for the thesis as an independent scientific final paper.
Workload	In addition to the $4 \times 15 = 60$ SWS attendance time, students are expected to spend an additional 240 h for preparation and follow-up work and independent project work.
Literature	Depends on the topic and will be announced in the course.
Keywords	Project work, marketing management, communication management, communication planning and conception
